

GUN-X: The Next Generation in Watering Gun Technology

The World's Best Selling Watering Gun is Now Faster, More Durable

In 1983, Philadelphia Scientific introduced the first affordable and reliable battery watering gun. This year, we have taken the battery watering gun to a new level of performance with the introduction of the next generation of battery watering gun.

As of September 7, 2010, the Battery Watering Gun (Model: GUN-X) is available for order. It incorporates a host of features that deliver the following benefits:

- Greatly improved strength and durability
- Faster fill speed
- Elimination of post shut-off drip
- Visual indication of shut off
- Improved ease of use
- Improved pricing

Superior Strength

- Built from rugged, engineered ABS plastic
- Weak points eliminated; pressure regulator incorporated into nozzle

Ergonomically Designed

- Easy-squeeze, rugged handle
- 45° bend nozzle
- Less bending over to fill battery

Integrated Flow Indicator

- Shows you when filling has stopped

Secure Level Control

- Will not move over time
- Adjustable or removable
- Pre-set for optimum level for most motive power batteries
- Beveled to conform to vent well at many angles

Flow Diffuser

- Converts the rapid flow to a gentle spray
- Protects nozzle from damage

Faster Fill

- 1.7 GPM
- Spend less time watering

The GUN-X was designed to consolidate and replace many of the models that we have carried in the past. Our goal is to simplify ordering and to reduce the number of part numbers that you must carry. With the launch of the GUN-X, we have discontinued the following older watering gun models:

GUN-B & GUN-FB
GUN-C & GUN-FC
GUN-G & GUN-FG
GUN-K & GUN-FK
GUN-R & GUN-R24

Please note that the 9" and 24" extension wands will still be available for use with the GUN-X so that it can be used to fill railroad batteries. Extensions (GUN-E9 & GUN-E24) must be ordered in addition to the GUN-X as needed.

The GUN-X can replace all of the above models because it incorporates the best features of all of the older models with significant improvements of its own!

When used with our Flip-Top vent caps, the GUN-X is an easy and economical way to water batteries.

The GUN-S and GUN-FS are still available and are intended for watering of flooded stationary batteries.

Please contact your local regional sales manager or call our customer service line (215-616-0390 and press 1) to discuss pricing and features of the GUN-X. As always, we thank you for your business.
